Board President Simmonds reported that Board Member Goodwin would not be present due to illness in the family.

APPROVAL OF MINUTES – Special Meeting February 10, 2014

Motion made by Board Member Boyer, seconded by Board Member Aubuchon, to approve the minutes of the February 10, 2014 Special Meeting as presented. Motion passed unanimously.

VOUCHER APPROVAL
None

PRESENTATION AND DISCUSSION: COMMUNITY EDUCATION /OUTREACH AND DRAFT PUBLIC SURVEY

Project Manager David Mach summarized discussions from the previous meeting. He explained that staff has already conducted some tabling events and has three upcoming open houses starting this week. He distributed information to the Board for them to distribute to the public and reviewed the schedule on page 50-4 of the TBD packet. Right now they are in the process of going out and educating the public. In April they will switch to the survey phase and bring information back to the Board in May. At that point they will potentially proceed if the Board so desires. Public Works Director Franz added that staff is using many methods to get the information out including email lists, the Transportation Task Group, boards and commissions, Inside Lynnwood, The Herald, etc.
Jeanne Acutanza, Director of Major Productions, from the consulting firm PRR, gave an update on outreach efforts. She stated that they held five tabling events around the City and reached about 90 people. She summarized that not everyone is aware that there is a lack of funding. People seem to think that the City takes pretty good care of the streets and there is general satisfaction about the City’s transportation system. In general, people understand the needs related to most of the projects listed in the brochure. There was interest in the topic of light rail which is to be expected since it has been in the news a lot lately. People understand the need for maintenance and capacity building. There was a lot of interest in pedestrian and bicycle facilities; although there were some comments that maybe there were too many bicycle facilities. As far as preferred funding options, a lot of people indicated a preference in the pay-as-you-go nature of sales tax as opposed to the lump sum bill you would get when you renew license tabs. There was some feedback that an increase wouldn’t be favorably seen.

Ms. Acutanza stated that there were three upcoming outreach events to be held at Spruce Elementary, Lynnwood Council Chambers, and the Operations and Maintenance Center. The brochures and some informational boards would be at those events. Bruce Brown from PRR gave a general overview of the proposed survey which is planned to be administered in mid to late April. The overall goal of the survey is to assess Lynnwood residents’ willingness to support a ballot measure to support transportation funding. He explained that they would be using a combination of paper surveys and online surveys. There will be a random sample of 5000 surveys sent out. There will also be an opportunity for others who are interested to participate in the survey, but the voluntary sample data will be kept separate from the random surveys.

Board Member Boyer asked about having ability for people to opt in to be part of future transportation topic discussions. Director Franz thought this was a good idea in addition to collecting people’s email addresses. Board President Simmonds asked how the information about race, age, languages, income, voting records, etc. would be used. Mr. Brown replied that it could be useful in targeting outreach and messaging to those potential segments better. Board President Simmonds commented that the 2010 Census showed that ethnic minorities now constitute about 40% of our permanent residents, but that doesn’t appear to be reflected in the voting records. He summarized that Lynnwood is a community in transition. Mr. Brown replied that that information would be part of the analysis of the survey questions, to make sure that we are getting good representation.

Board Member Boyer referred to the minority representation issue and asked if there is any way to direct folks to online options for seeing these questions in other languages besides English. Mr. Brown responded that is being done currently in Seattle where it is available online in Spanish and Vietnamese, but commented that this is not currently in Lynnwood’s budget. He pointed out, however, that when they have gone to the expense to do provide other languages in other surveys, there still aren’t a lot of people who go to those other language versions. Board Member Boyer commented that this is something the staff and Council need to be more cognizant of in upcoming years. Director Franz explained that the City already has to comply with Title VI requirements because a certain percentage of the population is Spanish-speaking.
Board Member AuBuchon asked Director Franz what has happened to the previous Transportation Task Group. Director Franz stated that staff met with them in the fall and told them what would be happening. They have been in contact with the group about when the meetings are and offered to get information into their hands. Staff is hopeful that they will hear back from them. When they met in the fall there was not a strong desire by the group to get together and have a series of meetings with staff. Nonetheless, staff hopes they will be involved and act as ambassadors to some extent. They were all invited to the open houses. Board Member AuBuchon asked who would own the survey data once this project is over. Mr. Brown stated that the City would own it. Project Manager Mach confirmed this. There was discussion about advertising the open houses in the paper. Board Member AuBuchon spoke in support of noticing these as open public meetings and encouraging Council to attend to interact with the public. Project Manager Mach concurred. He indicated staff would work on the logistics related to this.

Board Vice President Roberts spoke in support of the length of the survey. He echoed that they should attempt to notify as many people as possible about the open houses. Mr. Brown commented that they would be looking at the length of the survey as part of the pre-testing to make sure it’s not too long. He commented that it is typical after the pretesting to need to go back and reduce it even further.

Motion made by Board Member Boyer, seconded by Board Member Ross, to move forward with the public survey. Motion passed unanimously (6-0).

Mr. Brown explained what the results of the survey would look like. An Executive Summary will be created from the survey data which includes key findings, background, purpose, methodology, sample description, results, and highlights. He distributed a copy of a sample document which was created for Community Transit to Council Assistant Morris and indicated he would also send an electronic copy of the document to distribute to the Board.

Board Vice President Roberts said he is an alternate to the Community Transit and recalled that one of the eye-opening things about this survey was that many people thought that citizens would support a move to Sunday service. Most of people at Community Transit were stunned that it was 8th or 9th on the list. He commented that the information from the public survey is important to get because sometimes assumptions aren’t accurate.

60. ADJOURNMENT

Board President Simmonds announced that the time of the next regular meeting would be October 13, 2014 at 6:00 p.m., but noted that a special meeting would likely be scheduled in June to discuss the outcome of the public survey. Notices will be provided on the TBD website and in the local paper.

Board Member Boyer requested that there be a light Council agenda on the nights that they have TBD meetings and meet from 7 to 10 instead of 6 to 9. Board President Simmonds said he was willing to look into that, but noted that the times of the Regular Work Sessions and Business Meetings are dictated by LMC which says 7:00.
Board Vice President Roberts asked how much time they would have to review the information from the survey before being asked to make a decision about putting it on the ballot. Project Manager Mach referred to the schedule on page 50-4 in the packet. The June meeting is to review the data, and then there will be another meeting in July to make a decision about the ballot measure.

The meeting was adjourned at 6:57 p.m.

Loren Simmonds, TBD Board President

Lorenzo Hines, Jr.
Finance Director, acting as Board Treasurer
