**Be Proactive, Secure Your Finances and Identity**

- Empty your wallets of extra credit cards and IDs. Make one photo copy of the front and back of the credit cards and IDs you keep in your wallet. Date and keep the copy with your records.

- Never give your personal information over the phone, such as your date of birth, mother’s maiden name, credit card number, social security number or bank PIN code.

- Shred pre-approved credit applications, credit card receipts, bills and other financial information you don’t want before tossing them in the trash.

- Consider removing your name from the marketing lists of the three major credit reporting bureaus. This reduces the number of pre-approved applications you receive in the mail. In addition, contact the national Do-Not-Call registry 1-888-382-1222

- When ordering new checks, pick them up from the bank instead of having them mailed to you.

**Prevent identity theft on your computer**

- Remember that identity thieves often “phish” for information by misrepresenting themselves in an e-mail and encouraging you to go to fake web sites asking for personal information.

- Update your operating system and virus protection software regularly. Use a firewall program.

- Use a secure browser to encrypt information sent over the Internet during online transactions.
