The following requirements adhere to the 2009 International Fire Code, Section 2604 – Fire Safety Requirements.

A Pre-Hot Work Check shall be conducted prior to work to ensure that all equipment is safe and all hazards are recognized and protected.

Any work being performed prior to obtaining and posting a permit on site shall result in a fine.

CHECK REPORT

☐ Pre-Hot Work Check Report is completed, posted with the Hot Work Permit, and maintained and made available on site for a minimum of 48 hours after work has been completed.

☐ Hot Work equipment is in satisfactory operating condition and in good repair.

☐ Hot Work site is clear of combustibles or combustibles are protected.

☐ Exposed construction is of noncombustible materials or, if combustible, is protected.

☐ Openings are protected.

☐ Floors are kept clean.

☐ No exposed combustibles are located on the opposite side of partitions, walls, ceilings, or floors.

☐ Fire Watches are assigned.

☐ Approved actions have been taken to prevent accidental activation of suppression and detection equipment in accordance with Sections 2604.1.8 and 2604.1.9 of the 2009 International Fire Code.

☐ Fire extinguishers are operable and available as required.
