

## AUTOMOTIVE, BOAT OR VEHICLE BUSINESS BUSINESS LICENSE APPLICATION SUPPLEMENT

The Lynnwood Wastewater Treatment Plant treats waste with biological organisms. Excessive amounts of oils, solvents, grease, metals or pesticides can seriously impair the organisms. Any business which discharges into the City storm or sanitary sewer system is subject to discharge limitations. An inspection of disposal and cleaning records and a review of business practices may result if discharge problems are traced to your business site. Penalties and sanctions may be imposed if prescribed discharge limitations are exceeded. If you would like information about the regulations or need help meeting the requirements, call **425.670.6683**.

You may be asked to produce records such as receipts for disposal services or cleaning services associated with storage of chemicals, flammables and wastewater pre-treatment activities. Please make certain you keep such records.

Please check the box which best describes your automotive boat or vehicle business.
